

ME-WE FAMILY EDUCATION AND SUPPORT **GROUP ONLINE PROGRAM**

THE ISSUE:

Concerned about a loved one's use of alcohol or other drugs? **You're not alone and there is help.** Substance use disorder/addiction negatively impacts the user's life and the lives of those who love them. It's estimated that in America today, 48.5 million people 12 years of age and older meet the diagnostic criteria for some level of substance use disorder. Surveys suggest that for each individual who suffers from substance use disorder 3 to 5 other people are adversely impacted. This suggests that millions of others most of whom are family members have been directly or indirectly effected. Thoughts like, "it can't happen in my family" or "it's just a phase they're going through" can fuel years of denial, during which time overwhelming emotional and financial difficulties take their toll. The stigma associated with addiction along with a lack of understanding of what causes substance use disorder prevents many parents, spouses, other family members and concerned others from identifying the problem and seeking appropriate help. For most people, trying to navigate the consequences of a loved one's addiction feels next to impossible.
